Details:

Available space is less and varies due to many factors. A standard configuration uses approximately 4GB to 6GB of space (including iOS and built-in apps) depending on the model and settings. iPhone 7 and iPhone 7 Plus in jet black are available in 128GB and 256GB models.

Size and weight vary by configuration and manufacturing process.

iPhone 7 and iPhone 7 Plus are splash-, water- and dust-resistant and were tested under controlled laboratory conditions with a rating of IP67 under IEC standard 60529. Splash, water and dust resistance are not permanent conditions and resistance might decrease as a result of normal wear. Do not attempt to charge a wet iPhone; refer to the user guide for cleaning and drying instructions. Liquid damage not covered under warranty.

Data plan required. LTE Advanced, LTE, VoLTE and Wi-Fi calling are available in select markets and through select carriers. Speeds are based on theoretical throughput and vary based on site conditions and carrier. For details on LTE support, contact your carrier and see www.apple.com/iphone/LTE.

FaceTime calling requires a FaceTime-enabled device for the caller and recipient and a Wi-Fi connection. Availability over a cellular network depends on carrier policies; data charges may apply.

Siri may not be available in all languages or in all areas, and features may vary by area. Internet access required. Cellular data charges may apply.

All battery claims depend on network configuration and many other factors; actual results will vary. Battery has limited recharge cycles and may eventually need to be replaced by Apple service provider. Battery life and charge cycles vary by use and settings. See www.apple.com/ca/batteries and www.apple.com/ca/iphone/battery.html for more information.
